Union List of Serials

in Libraries of

The United States and Canada

Second Edition

The editor cannot any longer accept new titles or changes in holdings. Information concerning unusual new titles acquired should be sent to the publishers, The H. W. Wilson Company, 950 University Avenue, New York City. They will be added to the list of titles which is already being compiled as the basis for the first supplementary volume. In preparation for the supplementary service it is suggested that cooperating libraries should keep a record, preferably on cards, of changes in holdings and new acquisitions so that when requested this information can be supplied with the least trouble and expense.

To Cooperating Libraries:

In compiling the first edition of the Union List of Serials, it was decided that the titles which were reported complete by a large majority of the cooperating libraries would be marked "Complete sets generally found in large libraries." This was designed to save space and printing costs and it was felt that copies could be found easily enough so that exact statements were not necessary.

It was the original intention of the Advisory Committee to follow the same procedure in the second edition. However, while the work on the second edition has been going on, a number of requests have been received asking to have exact holdings of all titles indicated in order that libraries may borrow volumes needed from sources near at hand. When the statement "Complete sets generally found in large libraries" was used, requests for the loan of such titles were concentrated on a few large libraries. The Advisory Committee has agreed that, while there is a considerable increase of work in recording all holdings of such titles, the increased usefulness of the list may offset the labor involved.

Many libraries were asked to submit only more unusual titles, and many other libraries knowing that these titles had been marked "Complete sets generally found in large libraries" did not submit their holdings of them. In order to avoid a large amount of re-checking in the editorial office, and in order to make sure of complete coverage for these titles, we have decided to send the complete sets to all cooperating libraries, asking them to indicate their holdings of these titles. We realize that for some libraries this will mean duplication of work already done. The Committee regrets the necessity of asking libraries to repeat such work, but the repetition, which will involve a comparatively small amount of time on the part of any one library, will avoid a very large expenditure of time on the part of the editorial staff which is now hard pressed to complete its work by the end of this year.

These titles are all familiar ones and complete statements on them are included in the regular checking volumes. We have therefore included here only the title itself without bibliographical data. We believe that this saving in composition costs will not cause any inconvenience to anyone.

Since these titles are very widely held, it is suggested that libraries do not report scattered holdings, but only more substantial runs.

Explanations

A serial not published by a society or a public office is entered under the first word, not an article, of the latest form of the title.

A serial published by a society, but having a distinctive title, is entered under the title with reference from the name of the society.

The journals, transactions, proceedings, etc., of a society are entered under the first word, not an article, of the latest form of the name of the society.

Learned societies and academies of Europe, other than English, with names beginning with an adjective denoting royal privilege are entered under the first word following the adjective. These adjectives, Kaiserlich, Königlich, Reale, Imperiale, etc., are abbreviated to K., R., I., etc., and are disregarded in the arrangement.

Colleges and universities having a geographical designation are entered under the name of the city, state, or country contained in the title. Observatories, botanical, and zoological gardens, etc., not having a distinctive name, are entered under the name of the place in which they are located, unless they are affiliated with a university, in which case they are entered under the name of the university.

References have been made from earlier forms of a title or name to the latest form known, and in general wherever a reference might facilitate the use of the list. References from the name of a place to societies having their headquarters or meetings there are omitted in the checking edition. If practicable, these will be added in the final edition.
